INFICRYL 9555

INFICRYL 9555 is medium particle size Styrene Acrylic copolymer emulsion designed for superior flexibility, resiliency and least water absorption.

INFICRYL 9555 is specifically suggested for flexible cementations coatings, roof top coatings, and for water proofing of water tanks, swimming pools and terrace gardens. **INFICRYL 9555** is highly resistant to alkali hydrolysis; hence cementations formulations are highly durable.

SPECIFICATION:

Appearance	: Milky White emulsion
NVM % (120° C, 1 Hr)	: 55 +/- 1
Viscosity (ford cup, B-4)	: 20-23 Sec.
pH	: 8.5 - 10

OTHER PROPERTIES :

Polymer type	: Sty-Acrylic co-polymer
Film	: Clear and flexible
Sp. Gr. @ 30°C	: 1.05 (0.02

STORAGE LIFE :

Six months in closed container, protected from direct heat and sunlight.

STORAGE AND HANDLING :

To be stored in plastic container or corrosion resistant tanks in shaded areas away from direct sunlight & heat.
