INFICRYL TH-20

Introduction :

INFICRYL TH-20 is ammonium salt of Polyacrylates for use as an efficient medium for rheology adjustment. It also gives effective thickening without phase separation or creaming effect.

Application :

INFICRYL TH-20 is recommended as thickener for all water born coatings. Dosages could vary from 1 to 3 parts of 5% diluted solution of the product.

Specification :

Appearance	:	Milky white emulsion
Total Solids	:	22 ± 1%
Viscosity (RVT 3/20) 5% Solution	:	100-200 cps
pH (1:1)	:	9 – 10

Typical Properties :

Sp.Gravity	:	1.04 ± 0.02
Odour	:	Ammoniacal.
Storage Stability	:	Excellent.

Storage & Handling :

Product should be stored in HDPE drums under shade and away from heat & light.
